INJECTION MOLDED , RECESSED INSERT FOR USE IN A CONTAINER AND METHOD OF USING SAME

Abstract of the Disclosure

An injection molded, recessed insert is disclosed which is adapted to receive and hold a label or label holder. The insert may be snap-locked in an opening in a container such as a tote box. The insert provides a recessed area for the label or label holder so the label or label holder is not removed or ripped off of the container wall when contacted by another object. In one embodiment a cover is hinged to the recess.
